Digital Documentation for Fostering Growth in the 21st Century

To actively support, cultivate and improve the Greek knowledge ecosystem, supporting Research, Development, Creativity and Innovation, through eContent infrastructure and evidence based policy suggestions that foster and promote sustainable growth.

e-Infrastructure

EKT is the national e-Infrastructure aiming at supporting Greek Researches, Institutions and Public Bodies in their effort to decisively move into a data-centric, interdisciplinary and collaborative mode of operation and to actively link research outcomes with innovation and sustainable development.

eContent

- aggregating, collecting and documenting content, presenting it in accordance to international standards, so that it is re-usable and easier to find
- collaborating with publishers in the entirety of the publishing life-cycle, enabling open access to their content and facilitating scholarly communication
- having the most comprehensive Greek scientific catalogue regarding books, publications and other Copyrighted works
- offering the biggest Greek platform for reusable and open Galleries Libraries Archives and Museums (GLAM) and Research Education and Science (RES) content
- co-operating with over 100 GLAM and RES organisations regarding the aggregation, enrichment and further dissemination of their content
- disseminating research output, promoting open access to scientific information.

Metrics & Evidence-based Policies

- 
- collecting data regarding Research & Development activity, personnel, expenditure, scientific publications and regional RDI
 - measuring the innovation output of Greek enterprises and their global performance
 - publishing data regarding research activities in EU projects at the level of Greek academic institutions and individual academics
 - producing official indicators for Research, Innovation and Development in Greece, contributing to the Eurostat/ OECD statistics
 - contributing to the formation of evidence-based innovation policies by providing qualitative and quantitative data, analytical tools and robust methodologies.

Metrics & Evidence-based Policies

EKT is the National Greek institution for the collection, documentation, aggregation, perpetual preservation, dissemination and re-use of e-content.

EKT is an organisation with a long tradition of excellence in providing top quality services to the academic, cultural and public sectors. It provides the necessary tools, services and e-infrastructures for the support and encouragement of all the aforementioned activities.

EKT consistently supports open knowledge policies and tools as means of enhancing scientific research, educational activities and high quality cultural content and, thus, it is the pivotal organisation for fostering innovation and creative industries in Greece. It makes extensive use of cloud and green computing in an effort to support the virtuous cycle not only of knowledge but also of energy preservation and re-use.

EKT is an integral part of the National Hellenic Research Foundation, providing advanced e-services and e-infrastructures to all its Research Institutes. EKT cultivates the ecosystem of knowledge production by linking research to innovation and development, and by forming synergies with eminent institutions in the areas of science, culture and innovation.
