07 ES SSIT OIDF	Miniature bottle filler	A Canarian SME devoted to the production of rum is looking for machinery to automate the process of filling, capping and labelling of small liqueur bottles (30-50 ml).
06 IT LACI OGNV	Supercritical fluids (SCFs) or alternative technology to extract beta-carotene from carrots	An Italian company specialised in growing carrots and European leader in processing this crop is looking for a Supercritical Fluids (SCFs) or alternative technology to extract beta-carotene from carrots. The company's aim is to produce natural beta-carotene to replace the synthetic one used in pharmaceutical, cosmetic and food industries. A partner that can provide know-how and/or plant technology to industrialise the process is sought for technical cooperation, joint research or joint venture.
07 ES SSIT OIDP	Alternative treatment of cooling and/or re-use of cooling water in the production of pasta filata cheese	A Canarian SME that makes mozzarella-style processed cheese is interested in solutions for purification of the cooling waters so as to be able to reuse them in the production process. The company is also interested in alternative technologies to the cooling of this kind of cheese in contact with cold water.
07 BE BIRC OIL8	Printing machine with edible inks for the agrofood sector to print on edible ice-cream packaging	A Belgian company is looking for a very specific printing machine to print images on an innovative edible ice-cream packaging. The machine must print clear images in edible ink at a 10 to 20 mm distance from the printing head, in 4 colours, with a 200 to 500 dots per inch (dpi) resolution, and have solenoid valves. The Belgian company looks for a machine already on the market for a commercial agreement with technical assistance.

07 GB LDLT OIKB	Non-invasive methods for evaluating atherosclerosis and drug therapeutic effects	A London-based global pharmaceutical company is seeking non-invasive methods for evaluating atherosclerosis, most likely using some form of imaging techniques. The company would ultimately utilize this technology for measuring drug effects in clinical Phase II studies. The company is seeking collaborative work with academic institutions and/or businesses that have such capabilities.
07 ES CACI OI90	New therapies in clinical phase for the treatment of specialty diseases	A Catalan specialty pharmaceutical company in process of expansion is looking for new therapies in clinical development with a preferential focus on new chemical entities in the following therapeutic areas: nephrology - urology, rheumatology or CNS (Central Nervous System) diseases. The company is seeking to build strategic alliances with either the industry, academy or research organisations developing new therapies with therapeutic added value.
07 AT ATBI OI1Y	Collaboration to examine the pharmacological properties of a small peptide compound for the treatment of pulmonary oedema/Acute Respiratory Distress Syndrome (ARDS)	An Austrian research company is investigating the potential pharmacological effects of small peptide-like compounds for therapy of the pulmonary (lung) oedema/ARDS. They are looking for a research or industry partner to examine the pharmacological properties of peptide compounds in-vitro [e.g. using chamber experiments, ion-channel identification, patch clamp experiments] and in-vivo [e.g. lung oedema/ARDS animal models] and to assess inflammation markers of the lung tissue.
07 IL ILMA OIG9	Formulation of Ethnobotanical Medicinal materials from bulk state to finished products	A Florida R&D corporation specialising in medicinal discovery and development is seeking strategic partners to engage in late stage development (including clinical trials) and commercialisation of medicinal products primarily derived from botanical sources. Partnerships include venture capital opportunities and other corporations with the capacity to manufacture market and distribute medicinal products based on the proprietary technology.
07 CH RAEP OI95	New drugs and compounds for treatment of neurodegenerative diseases, multiple sclerosis, cognitive disorders and pain	A Swiss biopharmaceutical company specialised in the development of new drugs for global registration is looking for promising biologics and small molecule drug candidates in the field of neurodegenerative diseases, multiple sclerosis, cognitive disorders and pain for in-licensing. Only drug candidates presenting in vitro and first in-vivo results will be evaluated.
07 EE EETS OILN	Fermentation Technology for Glutathione (GSH)	A Chinese pharmaceutical manufacturing company is looking for the fermentation technology for Glutathione (GSH) which is the principal non-protein thiol responsible for maintaining intracellular redox status and protecting cells against oxidative/nitrosative stresses. The final titre of 2000 mg/L would be acceptable, and the technology requested should be of industrial level.
E L E C T R O N I C S , I T A N D T E L E C O M S		
07 GB EAST OIE3	Avionics/Software expertise (and products) to support aircraft upgrade programmes	A well-known UK-based aerospace service company wishes to enhance its avionics/software solutions capability in order to provide a comprehensive aircraft support and modification facility (avionics/software can account for up to 40% of the acquisition cost of new aircraft). The company is seeking SME partners with an established track record in avionics/software [e.g. writing safety-critical software] interested in a joint venture. A long-term synergistic partnership is envisaged.
07 GB LDLT OIH2	Underwater Sensing & Wireless Communication	A London-based multinational company in the oil & gas sector is seeking a partner to determine the potential for creating an underwater wireless monitoring device.
07 DE SDST OIN9	eHealth Platform for the Management of Stress and Prevention of Life-Threatening Diseases	A German SME has established a stress-therapy method to observe harmful changes, to make data-based stress-diagnostics and to generate data-based stress-coping-tools for patients. The SME is looking for companies active in the development/commercialisation of mentoring systems for high-risk patients, of visualising software for risk-taking behaviours of patients with life-threatening diseases, and for partners developing software architecture to transfer analysed data into the health system.
07 ES CACI OIGC	Integrated ICT Platform to support mass housing design and construction processes	A research group of a Catalan university is developing an R&D project focused on supporting the design and construction of mass housing with ICT technologies. The objective is to create a platform to promote interaction among all stakeholders participating in the design and construction throughout the whole building lifecycle. They are looking for partners for joint further development.
07 FR IFAN OIFD	Development of a software solution to manage back-office functions in the sector of insurance	A French company, provider of insurance software solutions is looking for a European partner with complementary technical skills. The objective is to develop a new software solution devoted to the sector of insurance.

ΚΩΔΙΚΟΣ	ΤΙΤΛΟΣ	ΠΕΡΙΛΗΨΗ
07 FI FILC OIJZ	Software modules for data service quality monitoring	A small Finnish company targets at improving service quality monitoring capabilities in its products. The company is looking for software modules available for licensing and integration to a core product. Areas of interest cover packet data voice service (VoIP, Voice over Internet Protocol) quality measurements, video quality measurements, MS Outlook service quality measurements and general IP-level packet data analysis.
07 NL NLSY OINO	Interactive live web casting platform	A Dutch SME produces high quality streaming video on the internet and is looking for an interactive live web casting platform, for use in e.g. training, seminars and discussions. The platform should be platform independent and must meet the following requirements: live streaming video/audio and slides in different formats (jpg, pdf), moderated text based discussion (chat) and poll. A license agreement or commercial agreement with technical assistance is being sought.
INDUSTRIAL MANUFACTURE, MATERIAL AND TRANSPORT TECHNOLOGIES		
07 TR TAOT OIEE	Applying Coatings With An Innovative System	One of the biggest furniture manufacturer companies in Turkey is looking for a new technology of environment friendly and harmless for human health Chromium & Nickel plating system for furniture metal parts in all dimensions, urgently. The company seeks commercial agreement with technical assistance and technical cooperation.
07 DE NSTT OIH4	Fibre reinforced polymer systems (FRPs) used for the strengthening, repair and restoration of building structures	A German SME has experience in the construction and restoration of concrete, masonry, facades, bridges, etc. The company is looking for a solution to replace reinforcing steel in construction and for example ring beams in restoration. The solution should preferably be attachable to the concrete, bricks, or other building materials without increasing the dimensions considerably. They are looking for technical cooperation.
07 DE NSNA OIGM	New applications for functional coatings based on nanotechnology to glass and polymer substrates	A SME from Lower Saxony applies functional coatings based on nanotechnology to glass and polymer substrates. Yet their range of products is related to anti-fog, anti-scratch, easy-to-clean, water-barrier, antistatic and chemical resistance properties. The company is looking for partners that are able to use these abilities to develop coating applications for sectors and products that are not in the main focus of the SME (e.g. automotive).
07 ES ACIC OIII	Photovoltaic PVC	An SME located in Navarre in northern Spain, and with some 40 years of experience in the area of manufacturing pre-coated sheet metal is looking for a partner - industrial or technological - with in-depth knowledge of PVC film with photovoltaic properties and its application and behaviour under different circumstances. Partners with knowledge of the construction sector would be of particular interest.
07 LT LTIC OIB4	Expanded polystyrene (EPS) recycling	A Lithuanian SME is looking for possible ways to re-use or utilise packaging material (polystyrene). The offered solution should include the equipment for processing the waste as well as procedures/technologies for processing of material produced. Solutions are preferred that are fully developed and already on the market.
07 GB NMRT OIBB	Battery Materials Project	A multinational company with an R&D facility in Europe wishes to partner externally to identify new materials for primary batteries and an improved understanding of performance-limiting factors in alkaline primary batteries.
07 DE NRXE OILO	High innovative and precise plant components for paper, film and foil industry	A German company active in engineering and design for the paper, film, foils-processing and tape-processing industry searches for suppliers/manufacturers of mechanical engineering parts as rollers, machine stand and structural steel parts. Likewise they are looking for suppliers of web guide regulations, drives, gears, and dryers (coil to coil).
OTHER INDUSTRIAL TECHNOLOGIES		
07 DE NDZA OIGE	Method to recycle sludges from aquafarms	A German SME is specialized in the planning and construction of aquafarms (aquacultures esp. for Trout, black sea turbot, carp and sturgeon). Due to the rising number of aquafarms all over the world the remaining salty sludges become a more and more crucial problem. The company is looking for a partner experienced in the treatment of sludges which arise from aquaculture fish production.
07 SE WSIV OIS9P	Removable holding device on to asphalt	A Swedish SME is looking for a technology to put smaller fences on to asphalt roads or/and yards outdoors. The fence shall be removable without damaging the asphalt. Company is seeking license or commercial agreement.
E N E R G Y		
07 PL SPIM OHPZ	Waste thermal treatment plant with effective multipurpose usage of energy	A Polish company collecting and transporting hazardous waste, big local player, is looking for technology for waste thermal treatment with effective multipurpose usage of energy. The company is seeking a technology capable of recovery of secondary materials as well as production of electrical renewable energy and recovery of heat. They are interested in technical cooperation with information exchange, license agreement, manufacturing agreement (subcontracting and contracting) or financing.
07 TR TAOT OIKY	Pumping Water With Wind Energy	A Turkish company that is located in Ankara and produces aluminium ventilation panels covering suspended ceiling systems is searching for companies that are interested in joint venture production of innovative wind turbines in their plant area in Ankara. These panels should be used for electricity and pumping water to houses. They are also ready to do manufacturing or commercial agreements with technical assistance.
07 FR NMCM OICC	Vertical axis wind turbine generator	A French SME has developed an innovative concept of rotor for a vertical axis wind turbine, as well as a production technology to manufacture wind turbine blades with a competitive and environment-friendly process. This SME is now looking for a partner in order to initially integrate a generator (and its control system) in its prototype (reduced size and output), and then in a second phase in all its future marketed products.
P R O T E C T I N G M A N A N D E N V I R O N M E N T		
07 GB EAST OIOH	Safe Disposal of Used Products containing strongly alkaline materials	A UK based chemical manufacturer active in the Medical, Industrial & Safety markets wishes to enhance its overall solutions capability to meet the global trend of increasingly stringent legislation. A safe & compliant disposal system/process is required once a product (e.g. 700g of an alkaline granular material in a plastic moulding) is used or out of shelf-life. The company is seeking established industrial waste management/engineering partners to ensure ongoing regulation compliance.
07 PL EPCA OIJV	Technology for sewage management and other wastes to retrieve renewable energy	Small Polish company active in recycling and waste management branches offers unique technology for managing sewage, plastic wastes and paraffin to make fuel. The company is seeking financial resources to build up a prototype.
07 PL SPIM OISU	Technology for utilisation of the cleaned parts of kinescopes	A SME from Central Poland, big local player in neutralising hazardous waste is looking for technology for utilisation of the cleaned parts of kinescopes. The company in cooperation with a big research centre has developed a technology for recycling of picture tubes. Now they are seeking utilisation of the cleaned parts of kinescopes - picture tubes glass. The company is interested in technical cooperation or commercial agreement with technical assistance, and also in a licensing agreement.
